

Year 5 Homework for Term 4

We will be developing our topic on how our actions have caused Global Warming. We are looking further into how human features have impacted our planet. We have chosen Florida, The Sunshine State.

Your task is to research the four questions below, over the next four weeks. Your work can be presented as a powerpoint presentation, which can then be included into your topic book.

Remember, we are asking you about FLORIDA as a whole and not just Orlando or Disney!

Your research questions:

1. How have humans changed the land use in Florida?
2. How does the climate of Florida compare to Swindon?
3. What would a tourist find to do in Florida? How does this differ from England?
4. How does the landscape of Florida compare to Swindon?
