

Year 5 Summer Project 2019

Dear children,

We enjoyed meeting you today for our swap-over session. Next year will be exciting as we learn about the Ancient Greeks, the Americas and the Vikings.

As you may know, our classes have been named after British birds. Mrs Walch's will be called Red Kites and Mrs Dunn-Christensen's will be known as Sparrowhawks. For your Summer project, we would like you to research a British bird. You may wish to include the following information:

- Images, drawing or sketches of your chosen bird
- A description of the bird – How you can identify it
- Factual information (size, length, wingspan, family group, scientific name)
- Habitat
- Breeding
- Hunting/Diet
- Legal Status

<http://www.rspb.org.uk/birds-and-wildlife> is a good starting point for information.

Your task is to carry out a project that can be presented to the class, in the first week back in September. You could present it as a booklet, scrap book, poster, or poem. You may decide to create a 3D model instead.

Please return to school on Tuesday 3rd September 2019 with your project. Thank you.

Happy holidays, happy researching!
Mrs Dunn-Christensen and Mrs Walch.
